**Course Description**

This colloquium will investigate the components of and requirements for majoring in agricultural and environmental education. The colloquium will focus on discipline specializations, professional organizations, requirements for working with children or youth, employment opportunities and current issues in agricultural and environmental education, extension, and environmental technology. Academic success strategies will be explored including understanding your university, adjusting to campus life, personal responsibility, diversity, time management and study skills.

**Objectives**

The course is designed to help you accomplish the following objectives:

- a. Describe the mission of West Virginia University, the College of Agriculture, Forestry & Consumer Sciences, and the Agricultural and Environmental Education Program.
- b. Describe the organization of the university, college and program.
- c. Identify factors that contribute to academic success.
- d. Identify your major area of interest in agricultural and environmental education (secondary, post-secondary, technology, extension, or international).
- e. Produce a plan for meeting college and certification requirements necessary for employment in your chosen area of interest.
- f. Describe the employment opportunities available in your area of interest.
- g. Identify your professional and educational philosophies.
- h. Identify present and future issues and trends that will impact agricultural and environmental education.
